ABOUT ME

Backend developer focused on Golang with experience in designing and implementing scalable RESTful APIs. Proficient with Docker and Docker Compose for containerization and service deployment, with experience in multi-service environment design and Dockerfile optimization. Familiar with PostgreSQL and MySQL databases, Git version control, and foundational knowledge in Linux, networking, and security. Experienced with CI/CD concepts, monitoring and logging, with a solid understanding of DevOps and Infrastructure as Code principles.

WORK EXPERIENCE

Full-Stack Developer

Ros (rosbrand.ir)

Feb 2025 - Present

Kerman, Iran

- Designed and developed the company website end-to-end
- Built frontend with Next.js, React, and TypeScript
- Developed and maintained backend with Golang, implementing scalable APIs
- Designed user and admin dashboards with full backend integration
- Integrated RESTful APIs for effective inter-service communication
- Implemented SEO-friendly structure using SSR in Next.js
- Managed complete Deployment process in Production environment

Full-Stack Developer (Remote)

Rafak - Paziresh Doctor (pazireshdr.ir)

Nov 2024 - Present

Kerman, Iran

- Developing new version of online medical appointment platform with new features
- Implemented frontend with Next.js, React, and TypeScript
- Developed and maintained backend with Golang
- Built multiple modules: Doctor Panel, Admin Panel, Health Records, Doctors Club
- Implemented real-time communications using WebSocket
- Improved application structure and scalability on both frontend and backend layers
- Collaborated with product and design teams for new feature development

Golang Intern

Rahkare Sanat Avapardaz (rahkarsanat.ir)

May 2024 - Feb 2025

Kerman, Iran

- Mastered core and applied Golang concepts through hands-on practical tasks
- Designed and developed RESTful APIs and worked with gRPC in real-world scenarios
- Worked with MySQL, PostgreSQL, and MongoDB databases in projects
- Implemented Microservices Architecture and System Design principles
- Developed services with Cloud-Native approach focusing on scalability
- Built containerized environments using Docker and Docker Compose
- Participated in CI/CD processes for building, testing, and deploying services

Frontend Developer

Aspilros (esperlos.ir)

Sep 2023 - Mar 2024

Kerman, Iran

- Developed custom web templates using HTML5 and CSS3 (Vanilla)
- Built responsive UIs compatible with multiple browsers
- Applied semantic HTML structuring and CSS optimization principles
- Basic PHP knowledge for backend development and integration

TECHNICAL SKILLS

Languages:

Go (Advanced)

TypeScript

HTML/CSS

PHP (Basic)

Backend & API:

RESTful API

gRPC

Microservices

WebSocket

Frontend:

Next.js

React

Tailwind CSS

Databases:

PostgreSQL

MySQL

MongoDB

DevOps & Infra:

Docker

Docker Compose

Dockerfile

CI/CD

Git

Linux

Concepts:

System Design

Cloud Native

Scalable Architecture

DevOps

IaC

Security & Network:

Network+

Security+

Monitoring & Logging

EDUCATION

B.Sc. Computer Engineering - Software

2022 - 2025

Islamic Azad University, Kerman

PROJECTS

Paziresh Doctor

pazireshdr.ir

- Online medical appointment booking platform used in production
- Full-stack: Next.js + React + TypeScript (frontend) | Golang (backend)
- Features: Doctor panels, admin dashboards, health records, real-time WebSocket
